

PUBBLICAZIONI

2021

Association between dietary inflammatory index and subclinical carotid atherosclerosis in the general population.

Atherosclerosis. August 2021 331: e251 DOI: 10.1016/j.atherosclerosis.2021.06.767

2019

A novel nonsense and inactivating variant of ST3GAL3 in two infant siblings suffering severe epilepsy and expressing circulating CA19.9.

Glycobiology. 2020 Jan 28;30(2):95-104. doi: 10.1093/glycob/cwz079.

Total loss of GM3 synthase activity by a normally processed enzyme in a novel variant and in all ST3GAL5 variants reported to cause a distinct congenital disorder of glycosylation.

Glycobiology. 2019 Mar 1;29(3):229-241. doi: 10.1093/glycob/cwy112. -Editor Choice-

2018

Diseases of ganglioside biosynthesis: An expanding group of congenital disorders of glycosylation.

Molecular Genetics and Metabolism 2018 Aug;124(4):230-237. doi: 10.1016/j.ymgme.2018.06.014.
